

# The Economic Value of Western Nebraska Community College

**W**ESTERN NEBRASKA COMMUNITY COLLEGE (WNCC) creates value in many ways. The college plays a key role in helping students increase their employability and achieve their individual potential. The college draws students to the region, generating new dollars and opportunities for the Western Community College Area (WCCA).<sup>\*</sup> WNCC provides students with the education, training, and skills they need to have fulfilling and prosperous careers. Furthermore, WNCC is a place for students to meet new people, increase their self-confidence, and promote their overall health and well-being.

WNCC influences both the lives of its students and the regional economy. The college supports a variety of industries in the WCCA, serves regional businesses, and benefits society as a whole in Nebraska from an expanded economy and improved quality of life. Additionally, the benefits created by WNCC extend to the state and local government through increased tax revenues and public sector savings.

This study measures the economic impacts created by WNCC on the business community and the benefits the college generates in return for the investments made by its key stakeholder groups—students, taxpayers, and society. The following two analyses are presented:

THE WESTERN COMMUNITY COLLEGE AREA, NE

WNCC influences both the **lives of its students** and the **regional economy**.

### Economic impact analysis

### Investment analysis

All results reflect employee, student, and financial data, provided by the college, for fiscal year (FY) 2020–21. Impacts on the WCCA economy are reported under the economic impact analysis and are measured in terms of added income. The returns on investment to students, taxpayers, and society in Nebraska are reported under the investment analysis.

<sup>\*</sup> For the purposes of this analysis, the WCCA is comprised of Banner, Box Butte, Cherry, Cheyenne, Dawes, Deuel, Garden, Grant, Kimball, Morrill, Scotts Bluff, Sheridan, and Sioux Counties.

WNCC promotes economic growth in the WCCA through its direct expenditures and the resulting expenditures of students and regional businesses. The college serves as an employer and buyer of goods and services for its day-to-day operations. The college's activities attract students from outside the WCCA, whose expenditures benefit regional vendors. In addition, WNCC is a primary source of higher education to the WCCA residents and a supplier of trained workers to regional industries, enhancing overall productivity in the regional workforce.

## Operations spending impact

WNCC adds economic value to the WCCA as an employer of regional residents and a large-scale buyer of goods and services. In FY 2020-21, the college employed 324 full-time and part-time faculty and staff, 95% of whom lived in the WCCA. Total payroll at WNCC was \$19 million, much of which was spent in the region for groceries, mortgage and rent payments, dining out, and other household expenses. In addition, the college spent \$12.4 million on day-to-day expenses related to facilities, supplies, and professional services.

WNCC's day-to-day operations spending added \$22.8 million in income to the region during the analysis year. This figure represents the college's payroll, the multiplier effects generated by the in-region spending of the college and its employees, and a downward adjustment to account for funding that the college received from regional sources. The \$22.8 million in added income is equivalent to supporting 370 jobs in the region.

## Student spending impact

Around 4% of students attending WNCC originated from outside the region in FY 2020-21, and some of these students relocated to the WCCA to attend WNCC. These students may not have come to the region if the college did not exist. In addition, some in-region students, referred to as retained students, would have left the WCCA if not for the existence of WNCC. While attending the college, these relocated and retained students spent money on groceries, accommodation, transportation, and other household expenses. This spending generated \$1.1 million in added income for the regional economy in FY 2020-21, which supported 23 jobs in the WCCA.

### IMPACTS CREATED BY WNCC IN FY 2020-21

Operations spending impact

**\$22.8 million**

Student spending impact

**\$1.1 million**

Alumni impact

**\$171.5 million**

TOTAL ECONOMIC IMPACT

**\$195.5 million**

OR

Jobs supported

**2,622**

## Alumni impact

The education and training WNCC provides for regional residents has the greatest impact. Since its establishment, students have studied at WNCC and entered the regional workforce with greater knowledge and new skills. Today, thousands of former WNCC students are employed in the WCCA. As a result of their education from WNCC, the students receive higher earnings and increase the productivity of the businesses that employ them. In FY 2020-21, WNCC alumni generated \$171.5 million in added income for the regional economy, which is equivalent to supporting 2,229 jobs.

## Total impact

WNCC added \$195.5 million in income to the WCCA economy during the analysis year, equal to the sum of the operations spending impact, the student spending impact, and the alumni impact. For context, the \$195.5 million impact was equal to approximately 4.1% of the total gross regional product (GRP) of the WCCA. This contribution that the college provided on its own larger than the entire Construction industry in the region.

WNCC's total impact can also be expressed in terms of jobs supported. The \$195.5 million impact supported 2,622 regional jobs, using the jobs-to-sales ratios specific to each industry in the region. This means that one out of every 21 jobs in the WCCA is supported by the activities of WNCC and its students. In addition, the \$195.5 million, or 2,622 supported jobs, stemmed from different industry sectors. Among non-education industry sectors, WNCC's spending and alumni in the Health Care & Social Assistance industry sector supported 423 jobs in FY 2020-21. If the college did not exist, these impacts would not have been generated in the WCCA.

### WNCC IMPACTS BY INDUSTRY (JOBS SUPPORTED)

**One out of every 21 jobs** in the Western Community College Area is supported by the activities of WNCC and its students.

An investment analysis evaluates the costs associated with a proposed venture against its expected benefits. If the benefits outweigh the costs, then the investment is financially worthwhile. The analysis presented here considers WNCC as an investment from the perspectives of students, taxpayers, and society in Nebraska.

## Student perspective

In FY 2020-21, WNCC served 1,257 credit and 1,255 non-credit students. In order to attend the college, the students paid for tuition, fees, books, and supplies. They also took out loans and will incur interest on those loans. Additionally, students gave up money they would have otherwise earned had they been working instead of attending college. The total investment made by WNCC's students in FY 2020-21 amounted to a present value of \$5.8 million, equal to \$2.5 million in out-of-pocket expenses (including future principal and interest on student loans) and \$3.3 million in forgone time and money.

In return for their investment, WNCC's students will receive a stream of higher future earnings that will continue to grow throughout their working lives. For example, the average WNCC associate degree graduate from FY 2020-21 will see annual earnings that are \$7,800 higher than a person with a high school diploma or equivalent working in Nebraska. Over a working lifetime, the benefits of the associate degree over a high school diploma will amount to an undiscounted value of \$327.6 thousand in higher earnings per graduate. The present value of the cumulative higher future earnings that WNCC's FY 2020-21 students will receive over their working careers is \$42.7 million.

The students' benefit-cost ratio is 7.3. In other words, for every dollar students invest in WNCC in the form of out-of-pocket expenses and forgone time and money, they will receive a cumulative value of \$7.30 in higher future earnings.

## STUDENTS SEE A HIGH RATE OF RETURN FOR THEIR INVESTMENT IN WNCC

Average annual return for WNCC students  
**23.6%**

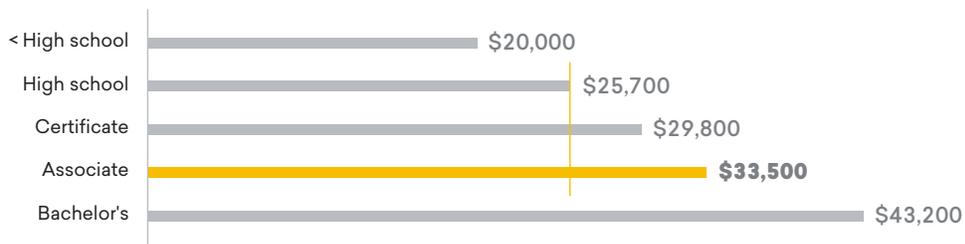

Stock market 30-year average annual return  
**10.5%**

Interest earned on savings account (National Rate Cap)  
**0.8%**

The average associate degree graduate from WNCC will see an increase in earnings of **\$7,800** each year compared to a person with a high school diploma or equivalent working in Nebraska.

Source: Emsi Burning Glass employment data.

Annually, the students' investment in WNCC has an average annual internal rate of return of 23.6%, which is impressive compared to the U.S. stock market's 30-year average rate of return of 10.5%.

### Taxpayer perspective

WNCC generates substantial benefits for taxpayers. These benefits to taxpayers consist primarily of taxes that the state and local government will collect from the added revenue created in the state. As WNCC students will earn more, they will make higher tax payments throughout their working lives. Students' employers will also make higher tax payments as they increase their output and purchases of goods and services. By the end of the FY 2020-21 students' working lives, the state and local government will have collected a present value of \$11.4 million in added taxes.

Benefits to taxpayers will also consist of savings generated by the improved lifestyles of WNCC students and the corresponding reduced government services. Education is statistically correlated with a variety of lifestyle changes. The educations that WNCC students receive will generate savings in three main categories: 1) healthcare, 2) justice system, and 3) income assistance. Improved health will lower students' demand for national health care services. In addition, costs related to the justice system will decrease. WNCC students will be more employable, so their reduced demand for income assistance such as welfare and unemployment benefits will benefit taxpayers. For a list of study references, contact the college for a copy of the main report. Altogether, the present value of the benefits associated with an education from WNCC will generate \$1.1 million in savings to state and local taxpayers.

Total taxpayer benefits amount to \$12.5 million, the present value sum of the added taxes and public sector savings. Taxpayer costs are \$23.8 million, equal to the amount of state and local government funding WNCC received in FY 2020-21.

Total taxpayer benefits amount to **\$12.5 million**, the present value sum of the added tax revenues and public sector savings.

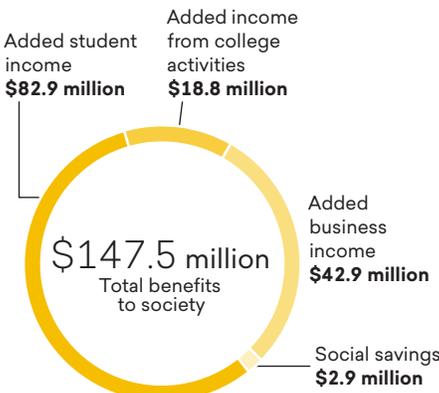

### Social perspective

Society as a whole in Nebraska benefits from the presence of WNCC in two major ways. Primarily, society benefits from an increased economic base in the state. This is attributed to the added income from students' increased lifetime earnings (added student income) and increased business output (added business income), which raise economic prosperity in Nebraska.

Benefits to society also consist of the savings generated by the improved lifestyles of WNCC students. As discussed in the previous section, education is statistically correlated with a variety of lifestyle changes that generate social savings. Note that these costs are avoided by the consumers but are distinct from

SOCIAL BENEFITS IN NEBRASKA FROM WNCC

Source: Emsi Burning Glass impact model.

the costs avoided by the taxpayers outlined above. Healthcare savings include avoided medical costs associated with smoking, alcohol dependence, obesity, drug abuse, and depression. Justice system savings include avoided costs to the government and society due to less judicial activity. Income assistance savings include reduced welfare and unemployment claims. For a list of study references, contact the college for a copy of the main report.

Altogether, the social benefits of WNCC equal a present value of \$147.5 million. These benefits include \$82.9 million in added student income, \$42.9 million in added business income, \$18.8 million in added income from college activities, as well as \$2.9 million in social savings related to health, crime, and income assistance in Nebraska. People in Nebraska invested a present value total of \$35.7 million in WNCC in FY 2020-21. The cost includes all the college and student costs.

The benefit-cost ratio for society is 4.1, equal to the \$147.5 million in benefits divided by the \$35.7 million in costs. In other words, for every dollar invested in WNCC, people in Nebraska will receive a cumulative value of \$4.10 in benefits. The benefits of this investment will occur for as long as WNCC's FY 2020-21 students remain employed in the state workforce.

### Summary of investment analysis results

The results of the analysis demonstrate that WNCC is a strong investment for all three major stakeholder groups—students, taxpayers, and society. As shown, students receive a great return for their investments in an education from WNCC. At the same time, taxpayers' investment in WNCC returns more to government budgets than it costs and creates a wide range of social benefits throughout Nebraska.

# CONCLUSION

The results of this study demonstrate that WNCC creates value from multiple perspectives. The college benefits regional businesses by increasing consumer spending in the region and supplying a steady flow of qualified, trained workers to the workforce. WNCC enriches the lives of students by raising their lifetime earnings and helping them achieve their individual potential. The college benefits state and local taxpayers through increased tax receipts and a reduced demand for government-supported social services. Finally, WNCC benefits society as a whole in Nebraska by creating a more prosperous economy and generating a variety of savings through the improved lifestyles of students.

## About the study

Data and assumptions used in the study are based on several sources, including the FY 2020-21 academic and financial reports from WNCC, industry and employment data from the U.S. Bureau of Labor Statistics and U.S. Census Bureau, outputs of Emsi Burning Glass's Multi-Regional Social Accounting Matrix model, and a variety of studies and surveys relating education to social behavior. The study applies a conservative methodology and follows standard practice using only the most recognized indicators of economic impact and investment effectiveness. For a full description of the data and approach used in the study, please contact the college for a copy of the main report.

The results of this study demonstrate that WNCC creates value from **multiple perspectives**.

Emsi Burning Glass provides colleges and universities with labor market data that help create better outcomes for students, businesses, and communities. Our data, which cover more than 99% of the U.S. workforce, are compiled from a wide variety of government sources, job postings, and online profiles and résumés. Hundreds of institutions use Emsi Burning Glass to align programs with regional needs, drive enrollment, connect students with in-demand careers, track their alumni's employment outcomes, and demonstrate their institution's economic impact on their region.
