ABOUT RFA ENGINEERING
RFA Engineering is an engineering service provider dedicated to delivering clients with timely and appropriate help on an as-needed basis. We provide quality engineering services to over 200 companies. State of the art computers, CAD and analysis software allow us to work interactively with our clients and function as an extension of the client's engineering staff.

We work in all areas of mechanical design, including off-highway mobile equipment and mechanical power transmission, consumer, recreational, industrial, medical products and one-of-a-kind special manufacturing machines. Projects include new product design and development, redesign of existing products, cost reduction, problem-solving, concept and analysis.

JOB DESCRIPTION/REQUIREMENTS
The selected candidates will support our clients with the documentation of off-highway equipment using Pro/E and Creo software.

The employee will support a design team and interact with other multi-functional teams including manufacturing, engine systems and hydraulics.

* AAS degree in mechanical or architectural drafting.
* Qualified candidates must have 2 years or more detailing experience.
* Ability to provide a high attention to detail.
* Strong understanding of GD&T
* Should possess a strong customer focus with the ability to communicate effectively with team members and clients both verbally and written.
* Previous experience with a solid modeling software is require, experience with Pro/Engineer and/or Creo software a plus.

Why work for RFA?
